DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/25/2002 has been entered.

Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the second paragraph of 35 U.S.C. 112:
- 3. The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claims 1-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
 - I. Regarding Claims 1, 15, 18, 31, and 32, It is unclear what is meant by the phrase "magnetoresistive resistivity sensitivity enhancing material."

 Doesn't the material enhance the sensitivity of magnetoresistive effect? If so, what is the distinction that is being made by calling for resistivity sensitivity? What does this mean?
- 5. The following is a quotation of the first paragraph of 35 U.S.C. 112:
- 6. The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the

art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

7. Claims 1-32 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. Omission of elements, critical or essential to the practice of the invention, from the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). See reasons set forth in the Office Action mailed on 26 July 2002.

Response to Amendment

- Note that the After Final amendment of 1 October 2002 has not been entered since entry was not requested by applicant. As a consequence, presented claims 34 and 35 have been renumbered as Claims 31 and 32, respectively.
- II. Applicant's amendments and arguments are not sufficient to obviate the section 112, first paragraph rejection of the Office Action mailed on 26 July 2002 and set forth above. Applicant has proposed recitation of free ferromagnetic layer materials. While this recitation would appear to incorporate additional essential subject matter in order to provide for enabled claims, it does not appear to provide all of the subject matter that the original disclosure described as being essential. That subject matter is referred to in the previous Office Action.
